

MIXED FARMING

National Qualification NQF 1

SAQA ID: 48971. (120 Credits)

Welcome to SA Campus Online!

SA CAMPUS is an online education and training company.

Online studies are designed for students whose scheduling commitments would otherwise make it difficult to enrol in a full-time higher education program.

Offered for individual courses, diplomas, associate's degrees and certificate programs, online studies are a valuable option. The resulting qualification a graduate receives after successfully completing.

Distance learning is an effective way to further your education. Congratulations on taking the first step to enhancing your career!

The training was so helpful in the day to day management of my own business. With SA Campus, I was able to study at my own time, managing to graduate while working full-time."

"I learnt so many things that I didn't know. The training was focused, in-depth, structured, balanced and straight to the point."

Education is
the **premise**
of progress

Kofi Annan

CAMPUS

What is a LEARNERSHIP?

+

A Learnership combines theory with practical skills in a work environment.

The student receives a qualification registered on The National Qualifications Framework.

ENTRY REQUIREMENTS:

To complete a learnership with SA Campus, you need to meet the following minimum entry requirements:

- You need to be at least 16 years old.
- You need to be able to read and write in English (as all the course material is in English).
- You need to be willing to study independently from home (with assistance from a tutor).

There are many courses that you can study even if you haven't completed Matric.

For some courses, though, additional entry requirements apply.

Please have a look at the course information pages in this brochure to see the full entry requirements for each course.

MIXED FARMING

National Qualification NQF 1

SAQA ID: 48971, 120 Credits

1. **National** Qualifications:

Mixed Farming is registered on the National Qualifications Framework (NQF). This qualification is designed to prepare you for a career in mixed farming, and is therefore focussed on equipping you with the skills that you need to succeed in plant and animal production.

- You will be assessed through online formative and summative assessment submissions.
- Assessment preparation will be done via an online quiz.
- Your tutor and assessor will provide assistance and feedback in order to ensure your success.

2. The **course content**:

- A learner with this qualification will have the necessary competence to participate as part of a working team, performing the agricultural processes as applicable to Plant and Animal Production as required for a mixed farming system in a closely defined context and under close supervision.
- Competency will be gained in a combination of the sub-fields of Plant and Animal Production as specified under Areas Of Specialization (i.e. Small Stock, Large Stock as well as Vegetables, Fruit Production, Hydroponics, etc.)
- The learner will be able to take responsible decisions within a limited range based on a sound understanding of the basic principles of agri-business and good agricultural practices, in meeting the set objectives and targets within the broader farm plan which includes the economical application of general resources, agricultural production and technical knowledge and skills, all in a Mixed Farming context.
- The Learner will be able to carry out repetitive procedures in a predictable environment and will be able to adhere to the relevant safety, quality, hygiene and technical standards as applicable within the industry.

2. The **course content**:

- Additionally, the learner will be well positioned to extend learning and practice into other sub-fields such as Plant Production and Animal Production, since such efforts will only require additional learning within the elective scope of other qualifications at this level.
- The learner will be well positioned to progress towards higher levels of Management and Technical production practices as defined by qualifications at the next level.
- Learners will be enabled to actively participate in the Primary Agricultural Sector through the production of quality agricultural products, enhancing the overall agricultural process and gain opportunities to access local, national and international agricultural markets.
- Finally, this qualification will allow qualifying learners to become economically active in farming practices that will have a direct impact on Local Economic Development through the production of food, the improvement of household food security and access to mainstream agriculture.
