DESCRIPTION:

This qualification is intended for people with prior work experience and/or an NQF Level 4 qualification in Project Management.

The learners accessing this qualification will be working in or with project management teams or using a project approach to their business. These projects may be technical projects, business projects, public sector projects or community development projects and will cut across a range of economic sectors.

This qualification is also of value to learners running their own business, as Project Management is an integral component of any business system.

WHY THIS QUALIFICATION?

The Qualification gives accessibility and flexibility to the unemployed and employed. The level of flexibility reflects the multiple job roles, organisational requirements and the changing technological nature of the industry and also allows the individual to work towards a nationally recognised Qualification.

OUTLINE:

1. Finances
2. Communication
3. Integrative Processes
4. Execution and Closure
5. Scheduling
